Discipline Specific Knowledge, Skills, Behavior and Values

1. BS Biology graduates will have attained a broad-based knowledge of Biology that compares favorably to their peers at a national level.
2. BS Biology graduates will have attained a well-founded knowledge of Cell Biology that compares favorably to their peers at a national level.
3. BS Biology graduates will have attained a well-founded knowledge of Molecular Biology and Genetics that compares favorably to their peers at a national level.
4. BS Biology graduates will have attained a well-founded knowledge of Organismal Biology that compares favorably to their peers at a national level.
5. BS Biology graduates will have attained a well-founded knowledge of Population Biology/Evolution/Ecology that compares favorably to their peers at a national level.
6. BS Biology graduates in biology will be able to conduct laboratory or field research.
7. BS Biology graduates in biology will be able to review biological literature, collect and analyze data, and present the data orally or in written form to the student's faculty mentor.

Critical Thinking

1. BS Biology graduates in biology will be able to conduct laboratory or field research.
2. BS Biology graduates in biology will be able to review biological literature, collect and analyze data, and present the data orally or in written form to the student's faculty mentor.

Communication

1. BS Biology graduates in biology will be able to review biological literature, collect and analyze data, and present the data orally or in written form to the student's faculty mentor.
Assessment of Biology - B.S. Outcomes
These outcomes will be assessed using a variety of assessment methods, including:

- Research projects
- Lab reports
- Tests/exams
- Oral and written presentations
