Introduction

An important component of the University of Florida's continuous improvement process is implementing continuous measurements to assess placement of degree students in employment or further studies. Assessment of student degree goals and the career planning process begins at entrance into the University (i.e., with the Cooperative Institutional Research Program (CIRP) Freshman Survey or the Entering Student Survey) and continues through the senior year (i.e., with the Graduating Seniors Survey). Although the Graduating Seniors Survey attempts to gather first destination plans, the Career Resource Center, VP of Student Development and Enrollment Services, Graduate Office, Undergraduate Office and College Deans and programs noted the need for an additional data collection point at commencement. Students often complete the Graduating Seniors Survey several months before graduation, when they may not have firm plans in place.

The UCF Spring 2005 First Destination Survey was designed collaboratively by OEAS and these UCF academic and administrative units to measure the initial employment and postgraduate education plans of students as they are exiting the University. This information source complements a University-wide Alumni Survey of graduates a year after graduation.

The UCF 2005 First Destination Survey instrument includes several data elements: (1) plans to continue studies in graduate or professional school; (2) school and location of postgraduate school; (3) expected financial assistance for further education; (4) current employment; (5) application for work in field and out-of-field; (6) status of job offer; (6) name and location of employer; (7) if accepted offer or will continue in current job - annual salary; (8) program of study and (9) identifying information to allow us to obtain demographic information from the student data base. The survey instrument is shown in Appendix A.

Methodology

The survey was administered to undergraduate and graduate students on April 25, 2005 through April 27, 2005 as they picked up their tickets for the commencement ceremonies. OEAS staff distributed and collected surveys from students as they were lining up for ticket pick-up. The students placed completed surveys in closed collection boxes managed by survey administration staff.

A total of 3,387 Baccalaureate degrees, 807 Master's, and 65 Ph.D. degrees were awarded in spring 2005. The total number of completed surveys for students receiving a Baccalaureate degree numbered 1240 representing a response rate of 37%. The total number of completed surveys for students receiving a Master's degree numbered 190 and completed surveys for Ph.D. students numbered 25, representing a response rate of 24% and 34% respectively.

Preliminary results are presented separately for undergraduate and graduate students.
